FOREWORD

6th edition **LUMEN International Scientific Conference** is a manifestation with multidisciplinary character, whose general objective is to promote scientific excellence, encouraging original researches.

With this edition we want to bring to debate the current dimensions of social action in a global and multicultural context. Social action suffers a paradigmatic mutation through its interplay with the communicative action, both the inter-individual and the mass communication being the key engines of social action.

Today more than ever, the social action is relocated and transferred to the virtual environment. Researchers in any field of social sciences and humanities were invited to contribute to a new paradigm of social action, based on the core values of contemporary society.
